

Pipisan Maug National High School Requests for a Refresher Course

Saturday, 15 August 2009

During the June 2009 visit in Pipisan Maug National High School in Tagum City (iSchools Project 2006 recipient under Bukidnon State Universtiy), we have heard the concerns of the teachers expressing their need for a refresher course re computers because according to them, though they have learned many useful things, they are not that technical persons to remember all of the things that were taught during the trainings and workshops. They would appreciate it very much if this request be granted and even willing to take part in the expenses that shall incur in the said activity. Through enriching the teachers' skills, increased student learning shall be expected.
